In these days of muddy and almost impassible roads in some parts of our county, there is a gleam of light and hope for an improvement in their condition in the action of the Board of Supervisors of Accomac at their last meeting. This hope is founded not only upon the approval by the Board of wise provision in a section of the road law passed by our last General Assembly, setting apart a certain sum of money for the building of permanent roads in each county of the State, wher an equal sum is appropriated by the county to that end, but in the action taken by them in the matter. In accordance with the provisions of said sec tion, it is gratifying to us to be able to state, that the Board at its meeting on Tuesday adopted a resolution, claiming the portion of the State road fund to which we are entitled, and is ready to make good their claim to it by putting up an equal sum. The Highway Commissioner of the State has been so ac vised and the request has been made of him, to send us a competent civil engineer to view the roads in three dis tricts of the county upon which, it is proposed, to expend the money. The sum to which we are entitled from the State road fund will be about \$5,200 and we will have, therefore, with the money, to be appropriated by the coun ty, double that amount to be expended in building permanent roads at point designated by the Board.

That the step taken by the Board i in the right direction, no one can question, who is disposed to take an intelligent view of the matter. It must oc cur to those who have given it a moment's thought, that with a competent engineer to advise and with proper materials to construct permanent roads as proposed, that we are getting out o the old ruts into which we have been floundering for years, and that there i progress in sight, which means a few miles of good roads at an early day an many miles of good roads over the main thoroughfares of the county at a date not very remote. An object lesson, in fact, in a few miles of permanent roads, is only needed to convince us that pays to have good roads, and to make us willing to assume the burdens necessary to secure them. Indeed, with permanent roads built, as is proposed in certain sections of the county, we believe, we will be able to see too much of vehicles, too much in the comforts and conveniences that they will give us, to worry over the tax that will be needed. We will then view it, not as a tax the county, indeed, are to be congratulated in having a Board of Supervisors so ready to see the benefits of permanent roads and to assume the responsibility for building them at once.

A bill has been introduced in Congress looking to an appropriation for a monument to President Tyler, and it is to be hoped, that sectional feeling will not defeat this measure as it has similar ones in the past. It is a disgrace to the country that the grave of this eminen Virginian has been left so long practi cally unmarked. That a monument i due to his memory for services rendered to his country is questioned by no one,

ary without war; and the South-West full attendance at this convention. remembers that to Tyler is due the fact that Texas became a part of the United States instead of a dependency of Great Britain.

It is high time the country should give some indication that the memory of this the public services he rendered are not trict will close May 1st, except President of the United States and of forgotten."

Congressman has Ferris, of Oklahoma, introduced in the House of Representatives at Washington a resolution providing for the erection in Washington of a monument to the memory of Gen. Robert E. Lee. The resolution declares that "for more than forty years it has been the wish of the united population of the country to erase from memory all differences between the States in the past. During all this period the citizens of the South have co-operated in bringing about that condition and likewise have added to the general advancement and upbuilding of the Union. A large number of heroes of the armies of the republic have been honored by the erection of monuments Gen. Lee, even though he was a soldier of a lost cause, was loved, revered, and honored." It is proposed to erect the statue near the Capitol, at a cost of \$100,000.

Letter to Thos. W. Twyford,
Accomac, Va.

Dear Sir: The facts boiled down are these:
Every job painted Devoe takes less gallons than of any other paint.
And the paint that takes least gallons wears longest; Always. We can't help it.
